**Subject:** Gorst Creek / Bremerton auto Wrecking Landfill  
**Attachments:** Summary of Gorst Creek.docx

Captain Laplatney,

Rick Albright requested I send you additional information regarding the contribution of waste from the Navy at the Gorst Landfill site.

EPA has compiled information about the site and the Navy's involvement from a number of sources including Kitsap County records, old newspaper articles, and documents obtained from the Navy, including the Navy's own PRP search conducted by Hart Crowser in September 1998. The records indicate the volume of waste contributed by the Navy at approximately 93,000 cubic yards delivered to the landfill. The total estimated volume of the waste in the Gorst Creek landfill is estimated at 150,000 cubic yards.

I have also attached a copy of the summary of the Gorst Creek / Bremerton Auto Wrecking landfill Operational History and Identification of Potentially Responsible parties.

Please feel free to have your any of your staff get in touch with me if there is anything they would care to discuss.

Thank you
